

Elevate Your Security Operations with FireEye Helix

INTRODUCTION

Cyber security has never been more challenging. Almost daily, new threats expose companies' vulnerabilities, forcing them to purchase more products and hire more talent. Such reactive approaches lead to escalating complexity — yet another vulnerability attackers can take advantage of. Security operations — big or small — require a holistic, foundational approach. FireEye Helix helps organizations build that foundation.

FireEye Helix is a security operations platform that makes it simple to deliver advanced security to any organization. It surfaces unseen threats and empowers expert decisions with frontline intelligence to take back control of your defenses and capture the untapped potential of your security investments. FireEye Helix works as a seamless and scalable foundation to connect and enhance all your security solutions, including non-FireEye products. Designed by security experts, for security experts, it empowers security teams to efficiently conduct primary functions, such as alert management, search, analysis, investigations and reporting.

Figure 1. Operational interface for immediate situational awareness.

BENEFITS

- **Raise your visibility**
Integrates over 300 FireEye and non-FireEye security tools and overlays nation-grade threat intelligence, rules, and analytics to deliver unparalleled situational awareness.
- **Accelerate response and minimize the impact of a breach**
Centralizes major security functions and automates workflows with pre-built playbooks informed by frontline experience.
- **Reduce total cost of operations**
Consolidates areas of existing spend including SIEM, threat intelligence and security orchestration.

WHAT IT DOES

-  Detects true enemies and understand their behavior
-  Enables informed decisions with contextual threat intelligence
-  Enhances the efficacy of existing security investments

Figure 2. FireEye Helix features.

 <p>Analytics Discover hidden patterns and anomalies in your data to further enrich detection and provide context for the investigative process.</p>	 <p>APIs Support open and flexible APIs for integration into 3rd party products, and seamless embedding into customer environments.</p>	 <p>Context Automatically coalesce related data to help drive faster decisions, including context across intelligence, alerts, host and user data.</p>
 <p>Compliance Predefined or custom dashboards and widgets to visually aggregate, present and explore the most important information to a user while meeting compliance requirements.</p>	 <p>Detection Apply FireEye expert rules and FireEye iSIGHT Intelligence against existing data to identify threats that others miss.</p>	 <p>Device and Policy Management Manage configurations, policies and health status across your environment.</p>
 <p>Intelligence Detect, enrich, explore and learn about the latest intelligence threats from FireEye, with breakdowns by country and industry.</p>	 <p>Investigative workbench Full index, archive, search and malware analysts against alerts and event data from all sources across the infrastructure to support flexible pivoting and fast hunting.</p>	 <p>Orchestration Automate and accelerate the investigative and response process via product integrations and defined actions for specific alerts.</p>
 <p>Role Based Access Control Create role based groups and assign granular permissions to access the console.</p>	 <p>Workflow Management Organize, assign, collaborate and action steps through the investigative process through automated and manual workflows.</p>
